

Welcome to 2018

A warm welcome to you all for 2018 and this year were opening it with a number 11 master vibration, new beginnings, gateways, ascension, evolution, positive growth so a new soul path for all as we take another sojourn around our sun, Sol. As well as entering the year of the Dog which can slow it all down as we progress gently as it also represents Guardianship and loyal qualities coming forward, protection of home & family and boundaries within the communities, so hopefully we'll see some strong positive changes globally in the community arenas and on the family home fronts within all countries in many new ways as we have some favourable planetary constellations lining up influencing us too. A nice settling year ahead after such a wild transforming one last year as the Phoenix roared through the skies, I felt I skidded through it sideways, but can now breathe again....for a while at least.

This year at the Divine Light Ocean Temple, I'm offering the same regular classes that have been running yet with more divine presence and heart felt healing as over the last decade we focused on the necessary shifts that were required for ourselves personally as well as for the planet.. There will still be the Magical Spiritual development circle on a Monday nights and 2 deep transforming meditation and activation classes on the Thursdays, one in the morning and one in the evening, these were running monthly last year and just as well with everything else people had going on in their lives and will be changing back to weekly again as the energies seem fit. I will also be introducing finally a Sacred Mystical School with classes once a month on the 3rd Wed, which is a full day of study covering a wide variety of topics and if you wish to attend on Wed. 21st Feb at 10.00 to the introductory day , you'll hear and see all the modalities being offered as there is some new exciting workshops coming in this year and I have been consolidating them into this grand Mystical School for your benefit., I also wish to introduce my new Oracle deck "The Ocean Star Gates" which are a collection of photographs from the Rye back Beach on a day that the clouds appeared with amazing faces, patterns, beings and air/ light ships in them. I have put sacred geometrical shapes over them to bring in a message , just as the clouds were speaking through the ethers....on the magical day of Wesak. I look forward to presenting this 85 card deck in this amazing method of reading them that also came through the geometrical layout.
